FTTH – For blazing-fast networks

GTC delivers Fibre To The Home (FTTH) technology.

This pure fibre infrastructure provides end-to-end fibre-optic cable, right into the home. More reliable, more dependable and faster than any available alternative, FTTH gives your customers access to the very latest in communication and entertainment technology and helps you gain a competitive edge.

- ✓ Blazing-fast fibre broadband – 300 Mbps as standard*
- ✓ 1 Gbps fibre networks with infinite potential
- ✓ Reliable and optimum service speed 24/7
- ✓ Freeview, FreeSAT, DAB Radio and the latest Sky TV packages available
- ✓ Straightforward installation – ready to use when the homebuyer moves in

GTC is the UK's leading independent provider, operating over 1.3 million new gas, electricity, water and fibre connections across the UK.

Working in partnership with Sky TV, GTC delivers blazing-fast 300 Mbps broadband and calls on future-proof fibre optic networks – plus great entertainment with Free Sky TV for 12 months.

With Sky TV and GTC, faster just got even better

A survey of 1,215 customers confirmed

- ✓ **80%** were discouraged from buying a beautiful house if it lacked good broadband
- ✓ **57%** would pay more for a home that was covered by 'super-fast broadband' (25 Mbps) service

At 300 Mbps, GTC's blazing-fast broadband leaves the rest standing

www.ispreview.co.uk

Subject to status. Upfront payment may be required. 12 months Free Sky TV offer: Original Bundle free for 12 months (usually £20 pm) for customers who reside in a property served by **seethelight**. 12 months minimum term and further terms apply. Check the **seethelight** website at www.seethelight.co.uk for more details. **Free Sky+HD Box Offer:** Excludes existing Sky+HD box households. One free box per household. Set up fees may apply. **On Demand:** Available to Sky TV customers with compatible Sky+ box. Downloading content requires compatible black Sky+ box, broadband connection (minimum recommended speed 2 Mbps), On Demand self set-up using built-in WiFi or own cable or On Demand connector (£21.95 – limits apply). Sky+ subscribers without Sky TV can access BBC iPlayer, ITV Player and All 4 only. **Sky+HD:** The HD channels you get depends on your Sky TV/HD package. BBC HD Channels, ITV1 HD (England and Wales only) and Channel 4 HD are available without subscription. Channel 4 HD requires a viewing card. **General:** Further terms apply. Correct at 17 March 2016.

FTTH What's the difference?

Unlimited speeds

FTTH technology is forward thinking, meeting customers' expectations today and their demands for tomorrow. Our network is capable of speeds with endless potential and a range of service packages are available to suit the needs of all your home buyers.

Services available via fibre:

- ✓ **Blazing-fast Broadband**
- ✓ **Telephone**
- ✓ **Television (optional)**
- ✓ **Information channel**
- ✓ **Online gaming**

Way beyond super-fast

Faster than any other available alternative, homes with blazing-fast fibre on a GTC network will deliver the ultimate online experience. This is a selling point in itself. Homeowners can browse, game, stream, watch, chat and work – all at the same time.

What's the alternative?

Copper – slow and unreliable

Copper is old-fashioned technology. Networks suffer from degradation and speed declines over distance. On average, copper delivers less than half the advertised 'up to' speeds in the UK.

The speed test

In the UK, the average broadband speed is 17 Mbps according to Ofcom**

Super-fast broadband = over 24 Mbps delivered via a copper connection or fibre-to-the-cabinet (FTTC).

Ultra-fast broadband = 100 Mbps delivered either by fibre-to-the-home (FTTH) or cable.

Blazing-fast broadband = 300 Mbps delivered via GTC's fibre-to-the-home (FTTH) network.

Fibre-to-the-Cabinet (FTTC) – faster than copper but erratic

FTTC delivers fibre only to the cabinet but still relies on copper cable for the last mile of delivery, from the cabinet to the home. This means many householders will never experience optimum 'up to' speeds.

*Actual speeds will depend on the service package selected.

GTC delivers...

Blazing-fast FIBRE

Faster, more reliable and consistently dependable, your customers will experience the difference from the very first click.

GTC delivers solutions

GTC is a unique, independent provider of utility infrastructure solutions with over 18 years' experience installing, owning and operating utility networks on new build developments across mainland UK. We operate over 1.3 million new gas, electricity, water and fibre connections. GTC works with all the leading national house builders as well as regional builders, consultants, landowners and land developers throughout the UK.

GTC delivers FIRS

Our fibre networks support a Fibre Integrated Reception System (FIRS) as an option. This can extend your offer further to include the delivery of a full range of TV and Radio services including premium content, 3D, HD and on-demand viewing.

GTC delivers sustainability

FTTH from GTC will help you gain credits towards CfSH. It also far exceeds government targets to provide superfast broadband, greater than 24 Mbps to 90% of the UK by 2015.

Find out how FTTH from GTC can benefit you and your customers.
