

Code of Practice (Gas)

Provision of services for vulnerable domestic customers (including the deaf and blind) and arrangements for accessing domestic customers' premises

GG-REL-IG-0125

Revision 4

Effective from: April 2023

Introduction

The following statement relates to GTC Pipelines Ltd. (GTC), Independent Pipelines Limited (IPL) and Quadrant Pipelines Limited (QPL) wholly owned subsidiaries of GTC Infrastructure Limited, hereafter referred to as GTC.

This publication explains how you can get in touch with us, what to do in case of a gas emergency, what the special services we provide for vulnerable customers are, how to recognise our staff, should they visit your home and how we ensure that those staff are trained and authorised. It is written in line with Conditions 17, 18, 19, 21 and 22 of our Gas Transporters Licence and approved by Ofgem.

GTC is a licensed gas transporter responsible for the safe delivery of gas through its networks to properties across Great Britain.

Any queries regarding the activities of GTC should be addressed to GTC at the address below.

GTC does not sell gas directly to consumers but ensures that it is delivered to the end user, in a safe and efficient manner. The companies that sell gas to consumers and send out bills are called gas suppliers. If you have an enquiry about your bill, your meter or the supplier's Priority Services Register, please contact your supplier. Contact details can be found on your latest gas bill.

Our Contact Details

Address:

GTC Infrastructure Ltd
Synergy House
Woolpit Business Park
Woolpit
Bury St Edmunds
Suffolk
IP30 9UP

Our Office Hours:

Monday – Friday 8.00am to 5.00pm

General Enquiries Line: 01359 240363

Email: info@gtc-uk.co.uk

We can also provide copies in large print, Braille, and audio format. If required, we can also provide translated copies.

Gas Emergencies

To report the smell of gas in your property, a loss of supply or a concern about the safety of our equipment, call the National Gas Emergency Service Provider free on:

Telephone: 0800 111 999

The National Gas Emergency Service Provider operates 365 days a year, 24 hours a day. Your gas supply will be made safe. However, this service does not extend to executing internal work beyond the meter. For more information on the emergency reporting procedure, please see our Emergency Services and Enquiry Service Statement.

Gas Safety

If you smell gas or are worried about gas safety, we recommend that you follow these instructions:

- Call the National Gas Emergency Service Provider on **0800 111 999**. They will take your details and offer your further advice depending on the information you give them.
- Turn off or isolate the gas supply if you are able to do so.
- Extinguish all naked flames.
- Open all doors and windows to ventilate the property.
- Do not operate any electrical equipment, including switching lights on or off.
- At entry and exit points to the property, you are advised not to operate any electrical security devices.
- A National Gas Emergency Service Provider engineer will attend within one or two hours, depending on the nature of the emergency. The National Gas Emergency Service engineers will always make the gas supply safe, when called to a suspected gas escape. However, the emergency service provided does not cover repairs to appliances or installation pipe work that cannot be completed within 30 minutes. The engineer will explain what course of action you need to take next, if applicable.

Priority Services Register

If you are a domestic customer, who has special requirements, it is important that we are aware of what these may be. Your supplier is obligated to keep a special register of customers who they have been advised are:

- Blind or partially sighted.
- Deaf or hard of hearing.
- Disabled.
- Of pensionable age.

- Chronically sick.
- Living with a minor or someone who qualifies for the service.

These details will then be passed to us so that we can bear in mind any special requirements you might have, should we need to visit your home.

You can register your details by:

- Contacting your supplier, who can also register you for other services related to their Priority Services Register. These may include free gas safety inspections of appliances and pipe work (if all adults in the household qualify). Their number is on your latest bill. Your supplier will then pass your details on to us.
- Writing to or calling GTC using the telephone number of address on page 2. Please tell us your name, address, telephone number and why you qualify for the Priority Services Register. We will pass your details on to your supplier if you wish.

Once we place you on our Priority Services Register, you may choose a password so that, if we need to visit your home, you can be confident that the person entering your home is a GTC employee or contractor acting on our behalf.

We will let you know in advance of a planned interruption to your gas supply, where possible, and we will try to keep you informed in the event of an unplanned interruption. You can also give us the name of a friend or relative to act on your behalf in the event of a gas supply interruption.

Under the Gas (Standards of Performance) Regulations 2005 (and as amended in 2021), we will arrange to provide any customers on the Priority Services Register with alternative heating and cooking facilities within 4 hours, or within 8 hours in the case of gas emergencies or unplanned interruptions that affect more than 250 people.

A copy of this Code of Practice in another language, a different format (paper or electronic), large print, Braille or on audiotape is available on request.

Planned Interruptions to your Supply

Sometimes we may have to interrupt the gas supply to carry out maintenance on our network to ensure continued safe operation. This may result in some inconvenience but we will always try to keep disruption to a minimum. We will write and tell you about a planned interruption to the gas supply in advance, where possible.

If you need any further information or advice about a specific planned interruption, please contact using the telephone number at the top of the notification letter advising you of the interruption.

Entering your Home

From time to time, GTC may need to visit your home to inspect or maintain our equipment on your property. Visits will either be made by one of our staff or a contractor working on our behalf and will do our best to adhere to any appointments that we make with you. We have arrangements in place so that customers can be sure that all visits are made by appropriate persons:

- GTC employees and contractors will have an identity card showing the company name, their own name, a colour photograph of the individual and a contact number in the event that you may have concerns. **Always check a visitor's identity card before letting them into your home.**
- Where possible, all vehicles used for visits to our customers' premises will carry the GTC or contractor's logo.
- Where possible, all GTC employees will wear clothing indicating they are from GTC.
- GTC employees will be able to give you explanations and information on matters relevant to the purposes of their visit.
- GTC will take steps to ensure that all ID cards are returned when an employee leaves the company.

If you have any doubts about whether a visitor is genuine, do not let them into your home.

GTC will ensure that its employees and contractors are aware of the contents of this Code of Practice and will comply with it at all times. They will be appropriately qualified and fully trained for the purpose of the visit and will be courteous at all times in their dealings with you, giving clear and accurate explanations as well as respecting your premises. If GTC needs to visit you on behalf of your gas supplier, we will abide by the supplier's Code of Practice that includes similar safeguards.

If you would like to feel more secure, we can agree a password with you when we make an appointment. If your gas supplier has arranged the appointment, please ask them to arrange a password with you for us to use.

Built Over Services

If we discover that a structure, such as a porch, conservatory, garage or extension has been built over our gas service or mains pipework, or that the gas meter is no longer accessible, for the safety of our customers and our network, we have a legal statutory obligation to take action and reroute the gas infrastructure in order to comply with the 1996 Pipeline Safety Regulations to ensure the safe conveyance of gas.

The work to divert a service that has been built over will likely involve some excavation work and can be inconvenient; however, we will endeavour to liaise closely with our customers to organise and complete the work with as minimal disruption as possible. This work is chargeable, but for those customers who can prove that they purchased the property after the structure was built, we will carry out the diversionary work free of charge.

Customer Satisfaction

If you have a problem with your gas bill, please contact your gas supplier. Their telephone number can be found on your most recent gas bill.

If you are dissatisfied with any aspect of the service you have received from GTC, please contact us and let us know using the details on page 2 of this publication. A copy of our Customer Complaints Procedure can be supplied free of charge and is also found on our website at www.gtc-uk.co.uk

Standards of Service

Our service is managed with industry wide standards of performance. If these standards are not met, we will, subject to certain conditions, make a payment to you via your gas supplier. Your supplier is obligated to send you details of these standards each year, or you can contact us to request a copy.

Standard	Brief Description	Compensation	
		Domestic	Non-domestic
Supply restoration	Resume supply within 24 hours (payment also for each succeeding period of 24 hours where supply is not restored).	£70	£115 (small non-domestic)
